EXPERIENCE

Gupshup

Bangalore, India

Product Engineer

April 2022 – August 2022

- Collaborated with stakeholders and clients to gather functional & non-functional specifications and refine user stories
- Increased the bandwidth of the PMO by 27 % by organizing and leading client meetings, and focusing on targeted deliverables while using project management best practices.
- Led a team of interns in developing a new employee orientation service, making the process 37% more efficient

Xebia

Gurgaon, India

Junior Developer

January 2019 – August 2021

- Planned, tracked, and managed the tasks on short-term sprints and long-term deployments
- Managed stakeholder expectations on identifying and resolving technical issues with zero SLA escalations
- Collaborated with 20 software engineers to develop a 360-web app for a finance giant, improving the client's data management practices by automating the onboarding process
- Led the creation of detailed design documentation, precise code, and unit-test plans which were used in the summer intern training program

PROJECTS

Downtown Bryan Case Study – Product Canvas

- Designed the Product Canvas for an integrated web application for the Downtown Bryan Association
- Applied Agile methodology and scrum framework to assign tasks to each sprint while creating User Personas, epics, scrum boards, burndown charts, UML diagrams Mockups, and Wireframes

Medallion Theatre Case Study

- Analyzed the medallion theatre case study and designed a business solution of a database management system to provide an end-to-end solution to keep a track of ticket sales, and customer issues and improve system efficiency.
- Managed tasks using Jira and facilitated scrum ceremonies while following agile methodologies.
